

**Press release “Visible growth and commitment”**

„The signs are indicating growth”- and this is why Brother Internationale Industriemaschinen GmbH started to construct a new warehouse of 1.500 sqm on 23 June 2016 with this symbolic first step. The new warehouse and logistic building will be an addition to the already existing 1.600 sqm, which will double the warehouse capacity up to around 3.100 sqm. “This is a necessary step to take due to the increased demand of Industrial Textile Printers and Sewing Machines,” says Valerio Scotti, Managing Director of Brother in Emmerich am Rhein.

For the past few years, the annual turnover consistently increased by approximately 20% yearly, which resulted into the increased need for more warehouse capacity, as well as the need for more staff to fulfill various educated roles. Over the same period, Brother has appointed around 5 new employees per year to increase the number of professional service engineers, sales & marketing and administration staff. The new warehouse is estimated to be completed November 2016.

Other promising signs for continuous growth over the next few years lies with new innovative products launching, as well as a strong international Team based in Emmerich am Rhein. With this expansion in mind, we would also like to mention that we are searching for a Trainee to train in the job of a Warehouse Logistic Professional. If you would like to join our team, please send your application form for the attention of Sabine Schöning.
